Town of Caledonia Commercial Truck Routes

The Town of Caledonia along with CHS Larsen Cooperative, Earth Sense Energy Systems, and Go Green Quarry would like to remind all truckers of the weight limit restrictions on roads in the vicinity of these businesses. We request all truckers review the map below and follow the appropriate route for the weight carried on each load. The purpose of these weight restrictions is to protect town and county roads, many of which were built decades ago with insufficient construction to carry the large loads hauled today. The Waupaca County Sheriff will be patrolling Town of Caledonia roads, as well as Waupaca County and State highways. Fines will be issued for non-compliance with the posted weight restrictions. Roads colored in **green** make up the approved truck route for accessing these businesses and include State Highways 45 and 96, a section of County Highway W, and sections of Brehmer and Guhl town roads. All remaining roads in this area, colored in **red**, are class B roads which have a maximum truck weight capacity of 60% of the posted GVW for each truck. Trucks carrying loads above 60% GVW are prohibited on all class B roads unless the pick up or drop off designation for a load is located on that particular section of road. Class B roads may not be used as through routes for vehicles exceeding the 60% GVW weight restriction.

The Town of Caledonia Town Board and our commercial partners are sure all truckers realize the importance of following posted weight limits and appreciate your support. Thank you for your help.
